University of Utah

M.S. in Computer Science

- Courses of Interest: Algorithms, NLP, Data Mining, Artificial Intelligence

Spring 2021 - Fall 2022

GPA 3.9/4

The ICFAI University, India

B.Tech in Computer Science & Engineering

- Ranked 3rd in my cohort

2006 - 2010

GPA 8.64/10

WORK EXPERIENCE

Kaulige Foods

Co-Founder/Director

May. 2016 – Oct. 2020

Bangalore, India

Kaulige Foods is a food-tech startup based in Bangalore, India. It specializes in creating smart farmer-to-consumer supply chains and operating cloud kitchens.

- Handled product development, process optimization and data analytics; assisted in managing operations, finance, marketing and sales
- Designed and implemented robust processes to collect relevant data; used Python to analyse data, generate predictions and display as dashboards, which proved extremely useful in improving operating efficiency and cutting down waste.

Ideasutra

CTO/Full Stack Developer

Feb. 2014 - Mar. 2017

Bangalore, India

- Lead developer responsible for all aspects of development, testing, deployment and operations
- Built Android apps using Java; web services using Scala/Play Framework & AngularJS
- Developed and released three products focused on early childhood development, each with unique aspects and identity - WheeKids, Pencilplay & PlayJam

EAFT Technologies

Software Engineer/Senior Software Engineer

Aug. 2011 - Feb. 2014

Bangalore, India

- Primarily responsible for Android app development, initially as an individual contributor and later leading a team of 3.
- Worked closely with clients for requirement gathering, prototyping, UI design & deployment.
- Participated in designing and implementation of standard practices for ISO 9001 certification

International Institute of Technology (IIIT), Hyderabad

Project Assistant

Aug. 2010 - May. 2011

Hyderabad, India

- Built an online "Virtual Lab for Image Processing" using PHP/Javascript and C/OpenCV
